PRODUCT FOCUS:  
Carbide Burs

## How Occlusion Can Affect a Single-Tooth Replacement

DR. ROBERT A. LOWE, Charlotte, NC

### RESTORATIVE

#### Thermo-viscous Technology: Trailblazing New Composites That Are Flowable and Sculptable

Dr. Peter Auster explains the use of thermo-viscous technology to modulate a nano-hybrid material that switches from flowable to sculptable using precisely dosed light and heat.

#### Clinical Solutions for Removing Excess Cement

Dr. Nathaniel Lawson, Ms. Preshtha Mangla, and Ms. Chandani Mantri explain that the easiest and most cost-effective method to clean excess residual cement from newly placed restorations is using dental floss. However, the practitioner should note the differences in these products and the effectiveness of each type.

#### The Gummy Smile and How to Improve it: When, Why, and How for Success

Dr. Josh Brower shows how using hypermobile lip surgery is effective for treating excessive gingival display and has good long-term results when performed correctly.

#### A Review of a New Color-Free Shade-Adaptive Composite

Dr. Nash evaluates a new and trending adaptive color-matching technology in restorative dentistry. He demonstrates how this innovative product cosmetically matches the shade spectrum of the patients' teeth—from A1 to D4—with one shade.

### OCCCLUSION

#### How Occlusion Can Affect a Single-Tooth Replacement

Dr. Robert A. Lowe discusses how occlusion affects the longevity and predictability of even a simple, single-tooth restoration.

### TECHNOLOGY

#### Getting Started with 3D Printing

Dr. Julia Latham explains the workflow in an office using 3D printing. She shares an example case in which she fabricated retainers ahead of time for a patient with orthodontic brackets, allowing the retainer to be ready at the debonding appointment.

### IMPLANTS

#### A Novel Approach to the Internal Sinus Lift

Drs. Philip M. Walton, Matthew J. Fien, and Israel Puterman present a simplified process of sinus membrane elevation by applying a visco-elastic putty graft through the osteotomy.

### ALSO IN THIS ISSUE

#### TECHNOLOGY & INNOVATIONS

offer the latest research from the labs and R&D centers of companies around the United States and the world.

#### QUICK TECHNIQUE

tells an abbreviated story of the techniques and products of today's dental practice.

#### NEWS & TRENDS

highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.

#### FOCUS ON

covers trends and hot topics in dentistry of direct relevance to clinicians and their practices.

#### VIEWPOINT

shares expert opinions on developments in the dental industry and how they will affect dental practices now and in the future.

#### INDUSTRY NEWS

tracks trends in the dental manufacturing sector, such as mergers, acquisitions, corporate restructuring, and top-level managerial appointments.

### BUYERS' GUIDES

#### 29th Annual Equipment Buyers' Guide

This extensive section will delve into all aspects of dental equipment, covering some of the newest and most innovative products.

#### Air-Driven Handpieces

This feature focuses on air-driven handpieces. It will offer manufacturers the chance to explain what makes their handpieces stand out.

### PRODUCT FOCUSES

#### Carbide Burs

This section will explore carbide burs. It will provide manufacturers with the opportunity to highlight the unique features of their carbide burs.

#### Sixth Annual Top Innovative Products

This feature covers some of the most groundbreaking products that have appeared in Dentistry Today during the last year. The section will also include products that will be highlighted during the Chicago Dental Society's Midwinter Meeting.

#### ***New for 2022: Our Redesigned Website!***
