Birmingham, Ala

BUYERS' GUIDE:

- Dental Implant Systems

PRODUCT FOCUSES:

- Digital Radiography—Panoramic Systems
- Metal Refining

Booth at the Florida Dental
Meeting: Bonus Distribution

AESTHETICS

Aesthetic Crown Lengthening Utilizing a Digital Workflow

Drs. Justin T. Kang, Catherine Hon, and Leonard J. Resnick, and Mr. Justin McElroy discuss a case of altered passive eruption that required crown lengthening. The incorporation of digital smile design software, a digital waxup, and 3D printing in combination with a multi-tissue laser delivered an efficient and predictable clinical outcome.

PERIODONTICS

A Simpler Approach to the Connective Tissue Graft

Drs. Dale Rosenbach and Shira Chava Theil show an interesting approach to harvesting connective tissue from the palate and using it as a graft for either tooth or implant.

RESTORATIVE

A Roadmap for Cementing or Bonding Ceramic Restorations

Drs. Nathaniel Lawson and Akram Sayed Ahmed answer the questions facing every general practitioner daily:

What cement should I use for different restorations, what are the differences in their properties, and what is the procedure for each one?

Practical Application of Digital Technology for Complete Dentures

Dr. Naren Rajan looks at the use of new technology for fabricating one of dentistry's oldest restorations. His case report follows a specific treatment pathway for a patient receiving complete denture therapy where both digital and analog processes were utilized.

IMPLANTS

Are Biologic Medications Becoming the New Catch-22 in Implant Dentistry?

Dr. Randolph R. Resnik notes that the field of implant dentistry is entering a new challenge, which could be far more significant and controversial than bisphosphonates. A new class of therapeutic drugs ("biologics") have been introduced in the medical world for the treatment of a wide spectrum of diseases and have implications in our clinical outcomes.

Immediate Implant Using a Socket Shield and a Final Titanium Abutment

Dr. Robert Miller introduces a concept of "one abutment, one time." He demonstrates the use of a final, definitive abutment at the time of surgery, which shows a statistically significant reduction of the crestal bone resorption around the immediately restored implants.

ALSO IN THIS ISSUE

TECHNOLOGY & INNOVATIONS

offer the latest research from the labs and R&D centers of companies around the United States and the world.

QUICK TECHNIQUE

tells an abbreviated story of the techniques and products of today's dental practice.

NEWS & TRENDS

highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.

FOCUS ON

covers trends and hot topics in dentistry of direct relevance to clinicians and their practices.

VIEWPOINT

shares expert opinions on developments in the dental industry and how they will affect dental practices now and in the future.

INDUSTRY NEWS

tracks trends in the dental manufacturing sector, such as mergers, acquisitions, corporate restructuring, and top-level managerial appointments.

BUYERS' GUIDE

Dental Implant Systems

This section will cover many dental implants. Manufacturers can highlight the features of their implants that make them stand out.

PRODUCT FOCUSES

Digital Radiography—Panoramic Systems

This month, we explore panoramic digital radiography systems. Manufacturers will have the chance to convey what makes their products unique.

Metal Refining

This section will focus on some of the innovative, state-of-the-art methods to dispose of dental material. Each company will explain what distinguishes the manner in which it operates.
