Small-Diameter/Mini-Implant Systems
PRODUCT FOCUS: Infection Control

IMPLANTS

A Technique to Retrieve and Recommission a Cement-Retained Crown With a Loose Abutment Screw

Dr. Timothy A. Hess provides a technique article that outlines the steps to remove, evaluate, and recommission the crown-abutment complex when the implant screw loosens.

Demystifying Implant Connections

Dr. Adam Barsoum notes that as newer implant systems continue to emerge on the market, the importance of understanding the different implant connections available is imperative for a higher standard of care.

Immediate Implant Placement at Multi-Rooted Sites: A Case Report

Dr. Brian Jackson shows how the immediate implant placement approach can streamline the surgical and prosthetic stages, reducing appointments and overall treatment time. This could impact patient decisions toward faster treatment rather than ideal treatment.

PROSTHODONTICS

A Simplified Workflow for Full-Arch Implant Temporary Restorations Using 3D-Printed Materials

Dr. David O'Dowling shares a case report that describes a simplified, completely digital workflow for a full-arch temporary prosthesis within 24 hours.

ORTHODONTICS

3D Treatment Letter: Modernizing Communication

Drs. Bill Layman and Keith Kiskaddon present the idea of a 3D treatment letter. In lieu of the traditional written letter describing the orthodontic treatment goals, they describe using a video and a 3D model to provide a visual representation of the case.

AESTHETICS

Dentin and Enamel Tooth Repair

Drs. Theodore P. Croll, James L. Gutman, and Nathaniel Lawson discuss a new radiopaque, bonded dentin replacement base/liner. They show the clinical technique using this dual-cured, calcium- and fluoride-releasing, self-adhesive base/liner.

RESTORATIVE

Thinking Outside the Drill: It's About so Much More Than Just Teeth

Dr. Lindsay Hoppe takes us through the restoration of a 16-year-old patient with a missing central incisor and low self-esteem. She discusses several options as well as her treatment planning process to achieve a satisfactory result.

ALSO IN THIS ISSUE

TECHNOLOGY & INNOVATIONS
offer the latest research from the labs and R&D centers of companies around the United States and the world.

QUICK TECHNIQUE
tells an abbreviated story of the techniques and products of today's dental practice.

NEWS & TRENDS
highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.
