SPECIAL SECTIONS:

BUYERS' GUIDE: WHITENING SYSTEMS

PRODUCT FOCUS: IN-OFFICE CAD/CAM SYSTEMS

BONUS DISTRIBUTION: CDA South, Anaheim, Calif

RESTORATIVE

Resolving Long-Standing Problems in a Full-Mouth Rehabilitation Case

Dr. Dimple Desai shares a restorative approach for an

older patient who had all but given up on addressing her primary complaint of jaw pain after a variety of treatment modalities meant to treat it had failed. The use of diagnostic modalities and careful use of prosthetics created a successful result.

Removable Gingival Prosthesis: A Novel Digital Workflow to Traditional Treatment

Dr. Adam Goldberg and

the team at Rutgers University look at removable gingival appliances. These can be a cost-effective approach to manage the aesthetic problems associated with vertical tissue loss in the aesthetic zone.

Tooth Preparation Technique for Predictable Impressions

Dr. George Salem shows a preparation technique that allows traditional or digital

impressions a method to capture the margins without disrupting the gingival tissue.

IMPLANTS

The Use of Zygomatic Implants in Restorative Cases

Dr. Dan Holtzclaw provides an introduction to zygomatic implants and sheds light on the

patients who may be appropriate candidates for this treatment modality. He details this interesting procedure that is an alternative to previously "impossible" cases.

Early Implant Restoration Through Photofunctionalization

Drs. Douglas W. Beals, John R. Francis, Dexter Barber, Trever

Siu, and John A. Cianciola discuss using ultraviolet light C (UVCL)-treated implants in the posterior mandible and restoring them in only 6 weeks.

PEDIATRICS

SDF Action in Proximal Caries Lesions

Drs. Theodore P. Croll, Joel H. Berg, Gerald A. Ferreti, and Steven R. Jeffries follow

the use of soft dental picks dipped in 38% silver diamine fluoride (SDF) solution as a means to soak caries lesions in contacting proximal tooth surfaces.

PERIODONTICS

Use of Aesthetic Crown Lengthening to Correct Gummy Smiles

Drs. Ahmad Soolari and Mohammed Seyed Mozaffari discuss an effective treatment of gingival excess using a periodontal and restorative approach with long-term follow up results of 8 years showing that the results can be maintained over time.

RADIOLOGY

What They Didn't Tell You About TMJ In Dental School

Dr. Dania Tamimi looks at the orthopedic stability of the TM joint. Looking radiographically

at the condyles to see if the condylar morphology is normal or degenerated is an important tool to help provide the etiology of the condition.

ALSO IN THIS ISSUE

TECHNOLOGY & INNOVATIONS

offer the latest research from the labs and R&D centers of companies around the United States and the world.

QUICK TECHNIQUE

tells an abbreviated story of the techniques and products of today's dental practice.

NEWS & TRENDS

highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.

FOCUS ON

covers trends and hot topics in dentistry of direct relevance to clinicians and their practices.

VIEWPOINT

shares expert opinions on developments in the dental industry and how they will affect dental practices now and in the future.

INDUSTRY NEWS

tracks trends in the dental manufacturing sector, such as mergers, acquisitions, corporate restructuring, and top-level managerial appointments.

BUYERS' GUIDE
